

# Learning Adviser Introduction!

These eight Learning Advisers support you anytime 14:00-19:00 on weekdays at the Student Support Desk in the Central Library\*

\*until next February

- ◆ Area of Specialty, Keywords
- ◆ My favorite place in the Central Library.
- ◆ The learning advisers would be useful in these ways...

*When you have difficulty with your study, you are interested in graduate student, anyway, whenever you like please come and talk with us.*

**TSUBOYAMA**

Graduate school of Life and Environmental Sciences, Agro-biological resources science and technology, Bio-diplomacy Course

*I am studying languages. I will be a good help for the students who are interested in the language or the linguistics. Please feel free to talk to me, regardless of your interests, when you have a problem. We will work together to solve it.*

◆ My favorite place is the desk in the back of powered mobile shelving, 5th floor of annex, it is so quiet and you can be relaxed.

◆ I'd like to ask learning adviser who studies different research field whether he/she can understand abstract of my research.

◆ How academic research can cope with legal instruments on genetic resources?

◆ Access and Benefit Sharing, Genetic Resources, Convention on Biological Diversity

◆ The study space with carrel desks (East side) on the 3rd and 4th floor (On a sunny day it's bright and has a nice view.)

◆ I would ask the adviser who is familiar to my own major, about the important literature in my domain or how to find documents. It will also be useful to ask him for advice about assignments.

**TSUDA**

Graduate School of Humanities and Social Sciences

◆ Japanese linguistics, French linguistics, Contrastive analysis between Japanese-French aspect, Japanese as a second / Foreign Language

*I speak fluently both Kansai accent and English. Please come and talk with me. I'm looking forward to seeing you!*

**TAKEDA**

Graduate school of Educational research course.

◆ My main major is pedagogy of physical education.

◆ higher education, students of physical education, career, job hunting, journalism.

◆ My favorite place is the "fresh" corner in the central library. Surfing newspapers and newly published journals, I can always find something interesting in various fields. Those media tell me the latest trend, it's very useful to catch social fashion.

◆ I use this service to ask how to write reports, or to know "How students of graduate school lead a school life?", "Why do you continue your research?", "What are interesting points of doing research for you?", and so on.

*For your delightful library life, I'll give you every support I can do! If you have discipline-specific questions, please ask adviser who majors in the field. I'll do my best to help you.*

◆ Study cubicles

The room has a large one-person desk, and we can use PC, internet and AC power source there. I use the room when I want to concentrate. It is located on the every floor from the 3rd to the 5th and very silent so we can make good progress in research with academic books. (only graduate students and teachers can use the room)

◆ When I came to this central library for the first time, I was perplexed at every single thing. For instance, I didn't know which ID I should use for logging on the computer, or how to print by computer, and so on.... No matter how petty your question is, we always welcome you! Don't hesitate to ask us\*^^\*

**KOBAYASHI**

Graduate school of Systems and Information Engineering

◆ image analysis method to detect lesion by using medical images  
◆ image analysis, medical images, computer aided diagnosis

**We, as students like you, are sure that we can offer you good services. I'll do my best to help you, so please do not hesitate to talk to me!**

**FUKUDA**

Graduate School of Comprehensive Human Sciences Master's Program in Art and Design, Fine Art, Western Style Painting

◆ Western-style paintings, Modern paintings

◆ I recommend the lounge on 3rd - 5th floor, near the elevator. In this bright room with a glass door, the foreign satellite broadcasting service is available. Also, it is allowed to have some drinks (only pet-bottled ones) and to use a cell phone, so I often use this room to take a short break.

◆ There are a lot of computers in the library, but which are the ones of "Zengaku computer system"? Which printer is for colored printings?

Ask us anything, even if it is a small question! Your questions which you cannot ask to your professor are also welcomed.

It may help you to talk with a learning adviser whose specialty is not the same as yours. You may get a new idea from him/her.

*I would like to support you, from a student's point of view, in using every bit of our libraries (materials, equipment, staff), hoping it will lead you to success both in learning and research. However trivial you may think it is, please don't hesitate to talk to us whenever a question, curiosity, something you want to make sure, etc... come to your mind.*

*Learning advisers, too, can learn and improve ourselves by getting inquiries from you all. Looking forward to seeing you at the desk☆*

◆ I personally recommend you the study space (with carrel desks) facing the windows on the 4th floor. You'll be able to study in a quieter environment than the 2nd floor, and the sky and the trees outside the windows will surely relax your brain.

◆ I would like to consult the learning advisers about basic essay drafts (if my Japanese or English makes sense, or if the structure is clear enough, etc...). If their academic interests are close to mine, I'd like to ask them to introduce some databases useful for my research, or to ask anything that I hesitate to ask the teaching faculty.

**NISHIURA**

Library Management Course at Graduate School of Library, Information and Media Studies, Master's Program

◆ Learning and research support services in academic libraries  
◆ colleges and universities, academic libraries, service management

**The library is not only the space where we take out a book, but also the space where we learn together and teach each other. So if you have any question, don't hesitate to ask us!**

**SHIMAOKA**

Graduate School of Pure and Applied Sciences

◆ I study photoisomerization of photore sponsive molecules. I synthesize photoresponsive molecules, and study it by photoirradiation.

◆ photochemistry, photoresponsive molecule

◆ International interaction space (3F-Lounge)

There are many famous comics, such as Doraemon and Sazaesan. If you are not good at Japanese yet, why not begin with reading Japanese famous comics in English?

◆ Not only the way how you use the library, but also you can ask about your study. I am a student majoring in math and science. So for example, please ask me how to write your report in an understandable way, how to choose the laboratory or how to use the SciFinder.

**Enjoy the time at library. There are lots of hidden treasure for you!**

◆ Do you know the communication room on 2nd floor? It is not well known for people, but it is opened to everyone. (You don't need to reserve the room) The communication room will be useful for you!

◆ The very first step of your study would be "Getting information". Just come to 'Student Support Desk', and tell us what you want to search. We are here for you!

**HONG**

Graduate School of Comprehensive Human Sciences Master's program in Kansei, Behavioral and Brain Sciences

◆ I am studying on 'Kansei evaluation for shininess of jewellery'. Shininess is one of the unique properties of metal which has strong visual and psychological effects when it is used in products. This study is an opportunity to understand user's behavior and to develop new designs and marketing techniques around jewellery. It also connects to a high end products and wearable design.

◆ Kansei, users' feeling, emotion, metal, shininess, jewellery, metal craft and jewellery, design
